

EVALUATION OF PROFESSIONAL STAFF

Supervision of Students

Students shall be under reasonable supervision of a school employee during the time the students are under the jurisdiction of the School Board. The amount of supervision shall depend upon the activity in which the students are involved, the age of the students, the number of students and the safety of the students.

Extracurricular Activities

All student activities sponsored by the Board shall require that reasonable supervision by an adult employee be arranged in advance. Particular emphasis shall be placed on the activities that involve the safety of the students.

Adults who are not employed by the Board may be used to assist employees of the Board with supervision of students. However, the primary responsibility for the safety of the students shall lie with the employee.
